### Using Simple Data To Help, Not Overwhelm Your Operations

- 

**Prioritized Alerts**  
Whether you are in the shop, the office, or on the road, never miss a critical alert about your equipment. Whether you are in the shop, the office
- 

**Historical Trending**  
View reports at any given time with graphical overlay to easily predict changes, failures and other anomalies.
- 

**Operational Platform**  
Customized views of specific operational requirements processes and equipment to execute streamlined efficiencies.

# HOW IOT WORKS

Internet of Things drives success through the compilation of sensors, gateways, applications and data analytics summized via remote access portals. Advanced Solutions & Controls leads the industry in innovative IoT solutions..

## CONNECT

Secured user interface with the ability to be viewed from anywhere, anytime.

## Report

Customized analytics to maximize report capabilities to improve processes and manufacturing time.

## Synergize

Data meets reality with the compilation of information solidified for real action and streamlined efficiencies.

## IoT Delivers Success

- Empowers decisions through timely analytics
- Reduces planned and unplanned downtime
- Communicates trends and information real time
- Remote access with seamless systems integration
