

ABOUT US

Advanced Solutions & Controls LLC was founded by Christopher Hurst, who currently serves as the company's Chief Operating Officer and Chief Engineer. ASC provides state of the art solutions to complex engineering projects leveraging over 20 years of custom engineering experience. By continually investing in people, technology and processes; ASC delivers robust end to end solutions.

Projects are managed through a partnership approach that ensures alignment between problem, vision and solution. Our proven and proprietary methods deliver robust and long-lasting solutions backed by industry leading technology. From start to finish, all custom automation solutions are designed, built, tested, and supported by ASC. Our team of engineers expertly deliver custom control panels, automation solutions, integration, troubleshooting, retrofitting, PLC programming, installation, startups, and commissioning of cutting edge turn-key automation systems. We work with original equipment manufacturers (OEM's) from around the world. If it has to do with automation, we do it!

Our mission

Our mission is to deliver state of the art solutions for our customers, using our manufacturing expertise to make products and provide solutions that contribute positively to the world. Through this, we deliver consistent results and increase value.

Controls

Our custom designed panels and control systems enable end user to go to market with speed and efficiency.

- ✓ Platforms including stand alone systems or integration
- ✓ IoT Communication
- ✓ Robust Analytics

Productivity in Production

Our in-house UL listed panel shop has the capabilities to build panels for any automation need, with all panels being built to UL standards. Panels can include the use of human machine interfaces to control aspects of an automation system and view information.

Digitize and Connect Industrial Equipment

Custom Designs

Large ideas come with large unknowns. As an experienced technology partner, ASC will help bring concept to reality with custom designed solutions. We partner with you to design, develop, manufacture, and test your product.

Remote Support

Through robust IoT solutions, ASC is able to remotely assist with solutions support, troubleshooting, and analytics.

Cross Industry Technology

Get a jump on the latest technology with an experienced partner in ASC. We research, source and develop the latest in automation, controls and distribution solutions so that you can stay a step ahead. ASC engineers are experts at using these technologies to design and develop your solutions.
